

Industrial Visit to Amazon BLRS Fulfillment Center

Coordinated by: Prof. Usha R

Event Date: 26th May 2026

Venue: Amazon BLRS Fulfillment Center

Academic Year : 2025 – 26

Students visited the **Amazon BLRS Fulfillment Centre** as part of the institution's experiential learning initiative, gaining first-hand exposure to the functioning of a modern e-commerce fulfillment facility. The visit provided insights into inventory management, warehousing, order processing, sorting, packaging, technology-enabled operations, and supply chain management. Students observed how automation, data-driven processes, quality control, and efficient workflow management support timely and accurate order fulfillment. The visit helped students connect theoretical concepts with real-world e-commerce and logistics operations while enhancing their understanding of supply chain efficiency, technology adoption, teamwork, and professional work culture.
